NAB should be ashamed of themselves, they have no right to dictate what I can listen to. I pay for xm so that I can concentrate on driving, and staying alert when driving my tractor/trailer. I was in a severe storm near detroit a few weeks ago, xm was first to broadcast where the storm was in relation to me and was also the only one to report that the streat i had to deliver on was closed due to flooding. It also allows me to keep tabs on the weather near my home in Okla. so that i can make sure my familoy is safe as well. The traffic and weather channels should stay; they are a whole different class of reporting. If I am willing to pay for a service, no one should be allowed to tell me I cant have it. I believe that to block broadcasting of these is unconstitutional, free enterprise, freedom of speech, right to life, liberty and persuit of happiness. You cant kill your competition, thats a monopoly, and I believe is why Bill Gates was investigated.No?
